Summary

Available Early Summer 2019!

This Steinway B has been in California since it was new, and the soundboard is the proof. It's got great crown and bearing, and sings and sustains like a brand new

soundboard. All-new Renner and Tokiwa action parts make it play "like butter."
We've made the touch, and the action, feel like a new Hamburg Steinway.
For the serious amateur or pro player, this is a \$60,000-sounding-and-feeling
instrument at less than half the cost. Come play this piano!
