### Summary

Every year, Yamaha produces a limited number of hand-built pianos meticulously crafted sparing no expense and utilizing the finest materials. These instruments represent the pinnacle of Yamaha's workmanship and they have been compared by many artists and technicians to Hamburg Steinways – they're that good. The S400 shares a host of refinements perfected in the centennial redesign of their flagship CFIIIS concert grand.

Tonally, it is magnificent, with rich overtones and a virtually unlimited palette of colors. The action is crisp and highly responsive. The soundboard is beautiful, and provides long sustain in all registers along with a bass that's comparable to a larger

7 foot semi-concert grand. This Yamaha S400 will compete with any top-tier instrument in its size, and is recording studio/performance hall ready.

This S400 is a single owner piano purchased new in 1989 and was never played, and is in NEW condition - there is no wear on the hammers, action and case are perfect. The new retail equivalent, the CF4, sells for \$110,000, so this is a chance to own a world-class instrument at a fraction of the cost!
